

The Guam Community Coral Reef Monitoring Program
& National Park Service Present...

SCIENCE SUNDAY

Sunday, May 18, 2014

2:00 PM

T.Stell Newman Visitor Center

It's All About Fish!

Eric Cruz, fisheries biologist with NOAA's Pacific Island Fisheries Science Center, will share his work on studying the life histories of reef and bottom fish. Collecting and analyzing otoliths (ear stones) and gonads will help him and others understand more about fish age and reproduction. See how it's done live! Cruz will demonstrate how he collects fish samples.
